

GLEIPNIR

The chain of magic—Gleipnir

Gleipnir didn't exist originally. In order to restrain the giant wolf Fenrir, the gods invited the best dwarf craftsmen—the king of Svartalfheim to make chains with cursing power. It is made of cat footsteps, woman beard, stone root, fish breath, bear tendon, bird saliva, which are rare things in the world.

GLEIPNIR

The chain of magic—Gleipnir

Material:	6N OCC with gold plated
Braid way:	8core 3-dimensional braided
Diameter:	1.2mm/core
Cores:	8cores
Strands:	49 strands of 0.06mm diameter per core, total 392 strands per cable
Cable skin material:	PVC
Plug:	4 pin detachable plug, 3-in-1 premium plug metal kits
Plug material:	Copper with 24 carat gold plated
Plug internal connection:	6N OCC+ OCC with silver plated mix conductor
Cable length:	122cm±2cm
Cable structure:	litz+ multiple structure+ twisting strands

Cable Process

Gleipnir is a 8 core of 6N OCC with gold-plated cable. Each core diameter is 1.2mm, which is braided from 49 strands of 0.06mm diameter wire with Litz structure. 200 mesh nylon wire is added to increase the tension. Precise and compact structure of 3-dimensional braid, effectively avoids the sound distortion caused by the skin effect and the proximity effect.

By increasing the number of wire stands and scientifically changing the proportion of various metals in the internal welding points of the metal plug, solve the problem that the gold-plated wire is difficult to drive. "Gleipnir" has excellent conductive performance and audio the signal gets better transmission.

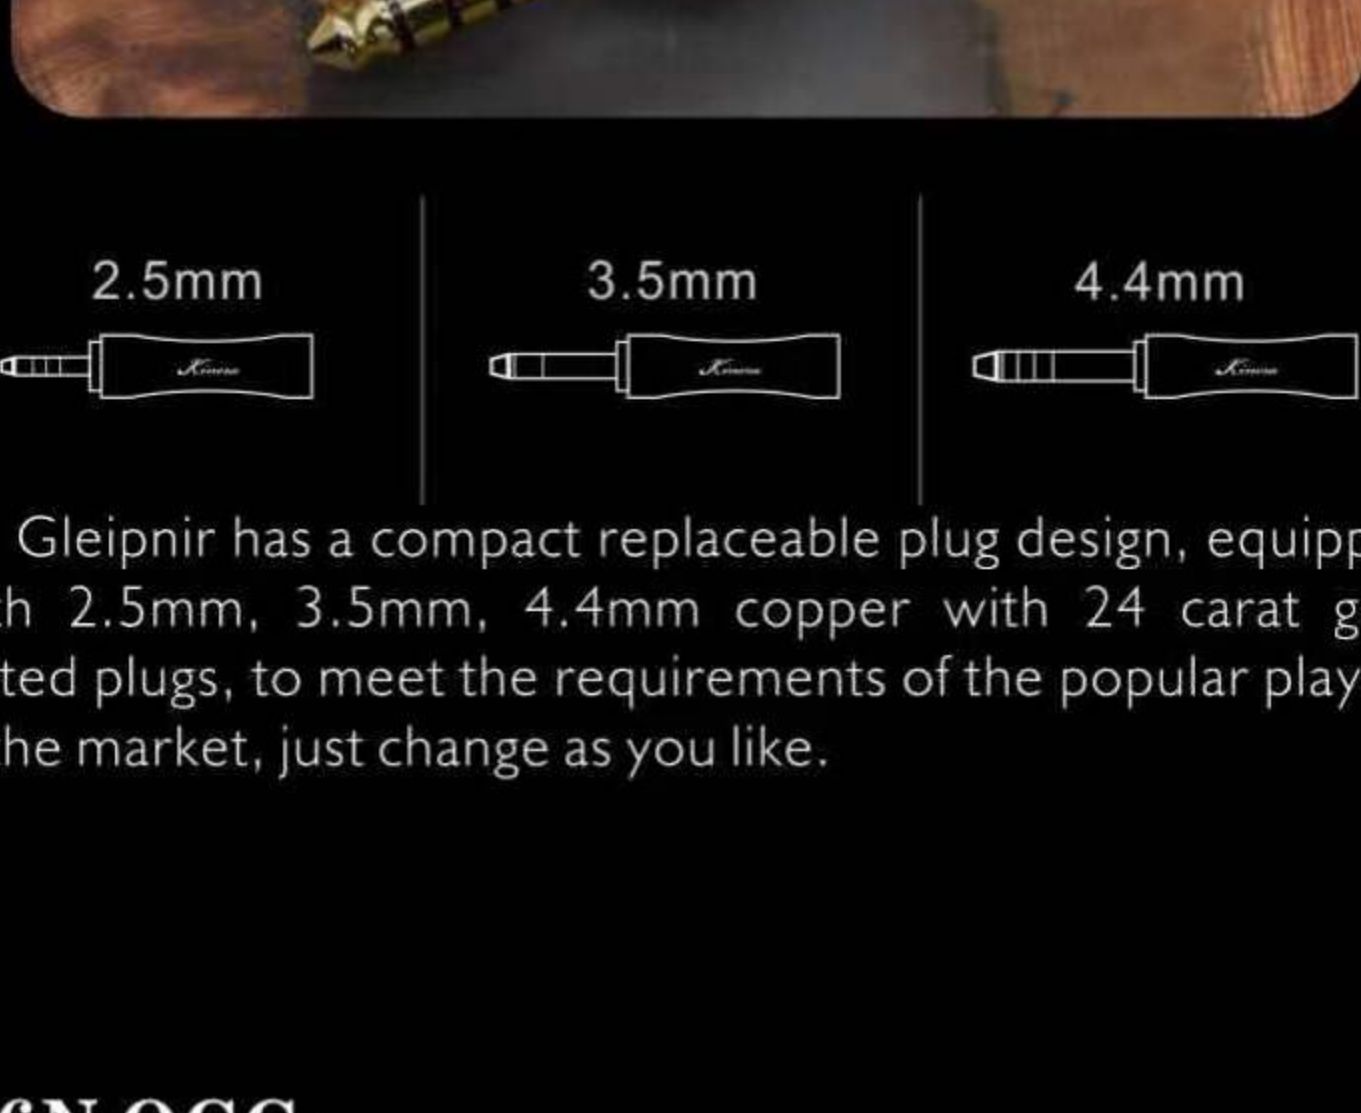

original 4 core OCC with gold-plated cable

Sound Character

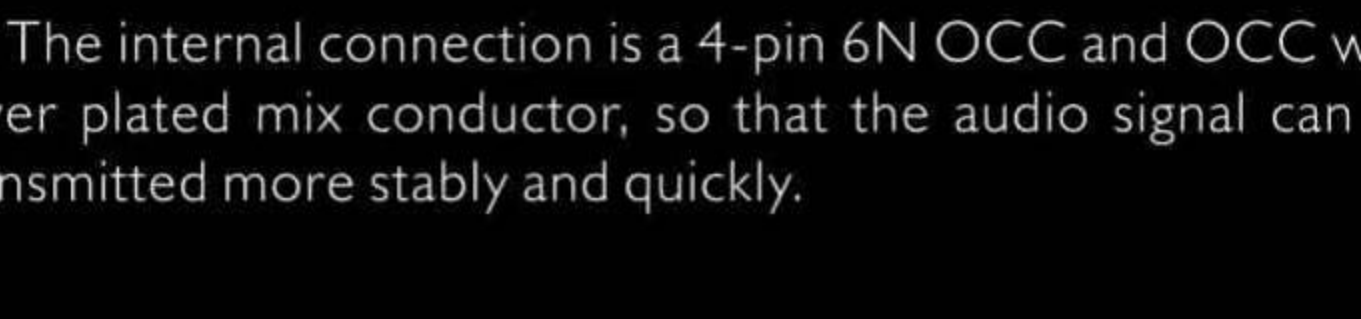

Compared with Baldr original 4 core OCC with gold-plated cable, Gleipnir, the upgraded 8 core one, retains the original sound character of high resolution, strong atmosphere and bright. The internal structure of the wire base and metal content of the plug-in parts have been changed through scientific process technology to expand the sound stage. At the same time, improve high-frequency extension, strengthen the overall upgrade of sound dynamics, transients, density and other sound qualities, bringing you a wonderful listening experience.

Replaceable Plug

Gleipnir has a compact replaceable plug design, equipped with 2.5mm, 3.5mm, 4.4mm copper with 24 carat gold plated plugs, to meet the requirements of the popular players in the market, just change as you like.

6N OCC+ OCC with silver plated mix conductor

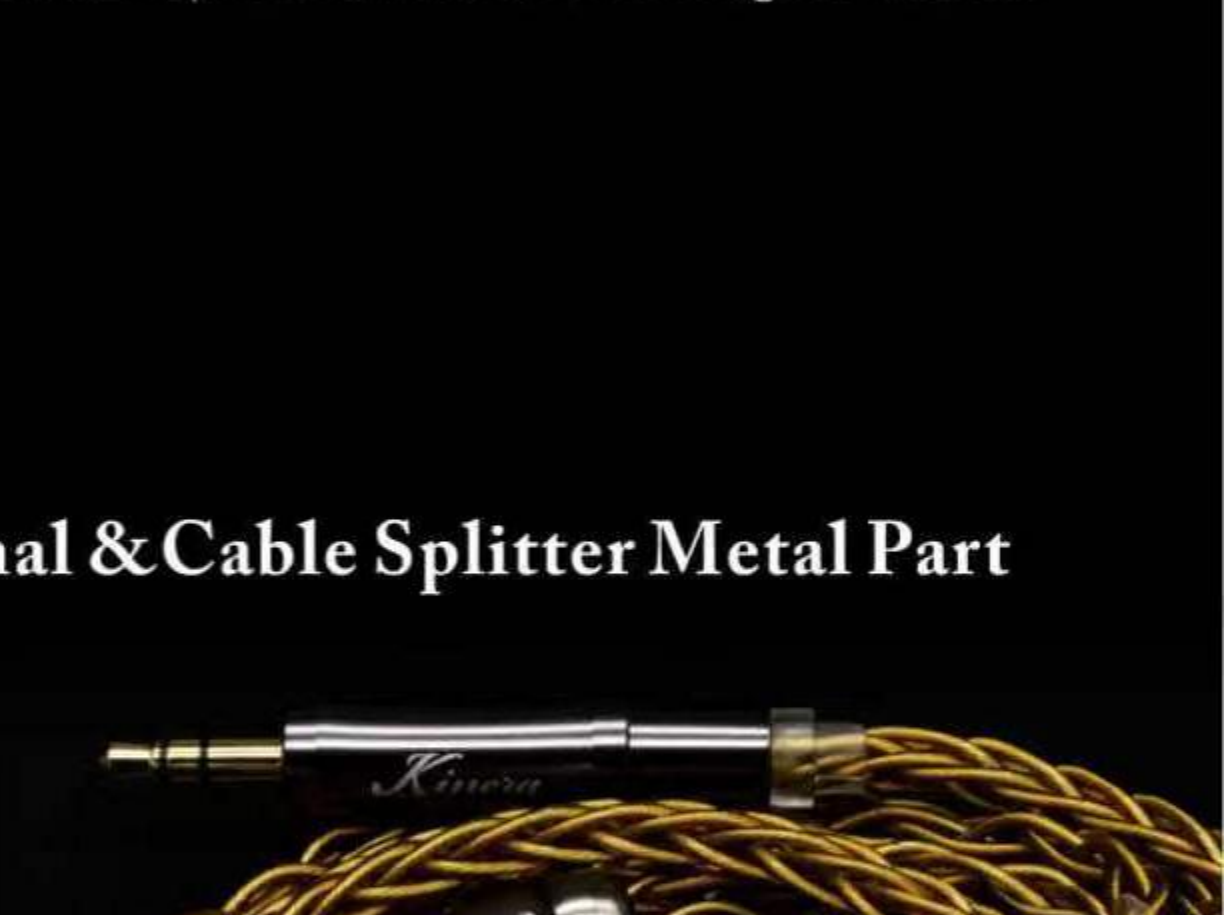

The internal connection is a 4-pin 6N OCC and OCC with silver plated mix conductor, so that the audio signal can be transmitted more stably and quickly.

lightweight aluminum alloy

Kinera customized plug

Kinera customized 0.78 2pin interface is with long service life

Plug External & Cable Splitter Metal Part

The plug external & cable splitter metal part are made of lightweight aluminum alloy. The surface is coated with anodized technology, which can effectively prevent the shell from scratch due to friction. It looks perfect even has been used for long time.

Protective Skin

The cable is covered with high-grade PVC, which is skin-friendly, soft, and wear-resistant. It avoids the stethoscope effect caused by the hard wire. Whenever and wherever you are, just enjoy it.
